

The Glenville State University Health Sciences High School Program is designed for high school students across the state of West Virginia who are eager to get a jump start on a college degree within the Health Sciences field at Glenville State University.

- Pre-Nursing
- Nursing
- Athletic Conditioning and Coaching
- Exercise Science
- Health Promotion
- Physical Education

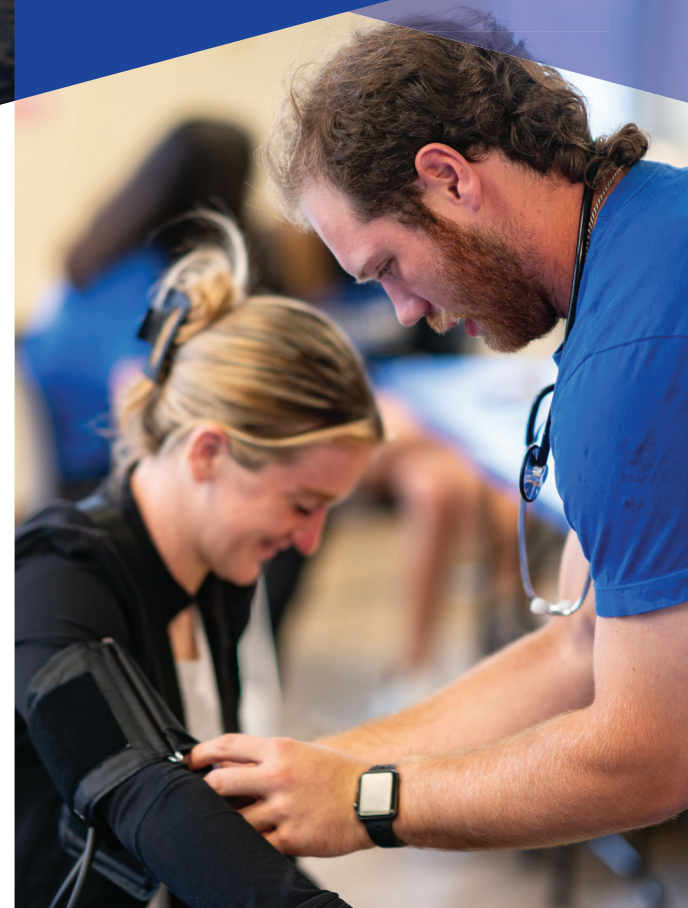

Students who choose to participate in the GSU Health Sciences High School Program will earn a total of 24 college credits during the duration of their enrollment in the program. Enrollment in the HSHS Program will help students become better prepared for a successful transition into their chosen Health Sciences degree path.
