There has been a buzz around campus that Glenville State College will soon have a Top 40 radio station. Well, the buzz is 100% TRUE! Certain members of faculty, staff, and students have been planning the new radio station, to be located on the first floor of the Mollohan Center. The station will be powered on by students and advised by faculty, which means students have the opportunity to play the music and possibly have their own talk shows. As all know, there isn’t a Top 40 radio station anywhere in the surrounding area. With only country and oldies surrounding area, with no Top 40 radio station. Glenville State College has to offer before. Students and students have had this problem for a while now. There was an attempt to solve this predicament by adding cages around the thermostats in the quads but there have still been problems.

Some may claim that finding students for this is unfair but breaking these restrictions is considered damaging building property and that it is a crime. The amount of the fine has not yet been specified but there will definitely be repercussions. Floor meetings will be taking place soon to inform the residents of these inspections. The thermostats were restricted to temperatures between 68 and 72 degrees before but with the inspections will also come improvements. After recording the condition of each thermostat the restrictor clips will be removed and replaced with tamper-proof screws to prevent this issue from continuing in the future, and the range of temperature will increase to between 66 and 74 degrees. The way the system works, at a certain outdoor temperature a main unit (located outside) kicks on and powers the entire complex. The reason for the specific range of temperatures is to save energy in the world’s ongoing effort to “go green.”

Turn up the heat!

Glenville State College cracks down on residents with broken thermostats.

Change is a big word around campus these days. Beautification projects are happening left and right, and there are more, more, more things to do. This semester will be the best semester ever! The station is expected to be up and running by spring semester 2011. For more information or if there are any questions as to be a possible disk jockey, please contact Jerry Burkham, whose office is located in Student Life.

Administration Reminds Students of Inclement Weather Policy
Students Urged to Use Good Judgment and Be Safe in Their Travels

By Whitney Stalnaker
Phoenix Staff

As the GSC community returns from Thanksgiving Break for the final three weeks of class, many are already looking ahead to the holiday season. All over camp-
us, particularly among commuters.

The weather became the hot
topic of conversation on Monday, as
a sudden downpour brought the weather
temperature drop, a small uproar
in the festive spirit, with the first
significant snowfall of the sea-
son taking place on Wed., Dec. 1.
However, for many com-
muter students, the cheer brought
about by the snow can quickly
come. "It's too cold, the heat doesn't actually
it's cold, the heat doesn't actually

Lady Pioneers Lose to Bowie State 57-64

The Lady Pioneers had a very poor shooting night as they suffered a tough loss at the hands of Bowie State; they shot only 21% from behind the arc and a total of only 34% for the game.

Tenisha Wilson led the Lady Pioneers in scoring as she dropped 17 points and grabbed a team high eight rebounds. Autumn Davis chipped in with 14 points on the night, while Danielle Woodmore dished out seven assists. Both teams had a number of turnovers for the evening. The Lady Pioneers turned the ball over for a total of 31 times while Bowie State turned it over 30 times.

Bowie State was led by Chas-nita Jordan with 15 points. With the loss the Lady Pioneers fall to 3-3(0-1) for the season. The Lady Pioneers will return to action on Tuesday, No-

November 30 when they travel to battle the Liberty University Flames. Tipoff is set for 7:30PM.

Lady Pioneers Fall to 3-4 after Road Loss to Liberty

The Lady Pioneers lost 75-93 on Thursday, November 30, when they traveled to Lynchburg, Virginia to battle the Liberty University Flames.

The closest the Lady Pioneers got to the Flames was at the 9:43 mark in the first half, Teni-sha Wilson hit a jump shot which brought the Lady Pioneers within three, making it 17-20, but the Flames never looked back after that.

Wilson led the Lady Pioneers with 22 points, while senior Autumn Davis chipped in with 15 points. Danielle Woodmore grabbed a team high of seven rebounds.

The Flames were led by Avery Warley with 17 points and grabbing 10 rebounds. The Lady Pioneers return to action this Thursday, December 2, when they travel to Bluefield State. Tipoff is set for 7:30PM.

Pioneers Fall Short in Home Season Opener

The Glenville State Col-
lege Pioneer men's basketball team lost a hard fought battle in their home season opener against the Wheeling Jesuit Cardinals 79-93.

The Lady Pioneers pulled within two points (62-64) after a fast break layup from Nickie Dent at the 2:25 mark. The Cardinals were led by ten points at that point in the game.

The Lady Pioneers turned the ball over for a total of 31 times while Bow-

ie State turned it over 30 times. For a total of 31 times while Bow-

ie State turned it over 30 times.

The Pioneers fell to 3-3(0-1) for the season.

The GSC Pioneers turned it over 30 times. For a total of 31 times while Bow-

ie State turned it over 30 times.

The Pioneers return to action Thursday, December 2, when they travel to Bluefield State. Tipoff is set for 7:30PM.

Cycling Club

The GSC Cycling Club Starting Up Again in the Spring of 2011

Devon Maher Advertising Manager

What is the Cycling Club? It is a bunch of individuals that get together during the Spring months and go on cycling rides every two weekends. Then, for the more adventurous, we will go on a week long ride imme-

diately following graduation.

Do you have to be in great shape to ride? You will want to be in decent shape by the time of the long ride. We will start off do-

ing a couple of 20 plus mile rides. Hopefully, we will get up to a 72 mile ride between Clarksburg and Parkersburg before the big ride.

What’s the cost for the regular rides? Free. You just need to bring your own snacks to eat on the trail and/or money to eat at a restaurant.

What’s the cost for the long ride? The overall cost will be just a little over $100.00. It defi-

itely should be under $150.00. This includes: gas, camping fees, payment to two people to drive the van and setup camp, and a custom T-shirt or cap.

What if I do not have a bike? The High Adventure Pro-

gram has some bikes available on a first-come-first-serve basis. Do you ride up big hills? Nope. All of the rides, includ-

ing the long ride, are on rails-to-trails. What are rails-to-trails? They are railroad lines that have been taken up and transferred over for bicycle rides. Even go-

ing up a hill is not major because a train has to be able to go up the slope. Some rides, like the Clarksburg to Parkersburg ride has lots of tunnels and bridges. Do I have to go on a cer-

tain number of rides? To go on the long ride you should attend at least 4 of the shorter rides. How do I find out more about the cy-

cling club and how do I sign up? Contact Fred Walborn, PhD at: Frederick.Walborn@glenville.edu or call him at extension 6279.

For more information, contact Dr. Fred Walborn at 304-462-6279.
Construction Projects Planned for Capitol

By Phil Kabler
Charleston Gazette

Next year will be a busy one for construction projects at the state Capitol Complex. Ad- ministration Secretary Robert Ferguson said the building, which is home to 10 state agencies, will be the site of a $27 million renovation this year, the $27 million renovation

From a major renovation of an office building to replacement of 80-year-old restroom fixtures in the Capitol, 2011 will be a busy year, Ferguson said.

The major project will be the long-delayed renovation of Capitol Complex Building 3, com- monly known as the DMV building.

“Construction of 80-year-old restroom fixtures in the Capitol, 2011 will be a major project, including replacement of fixtures,” he said.

Executors offices for the Depart- ment of Revenue and Human Re- sources, and those employees are slated to move into the One Davis Square building downtown dur- ing the first week of December.

Bid opening for the reno- vation project contract is set for Dec. 9, and construction work should begin early in 2011, Ferguson said.

When completed, the updated- Building 3 will feature a confer- ence and meeting center, elevator, and restrooms on the first floor, and of- fices for the state auditor and trea- surer’s offices on the upper floors.

The project is due to be completed in fall 2012. Meanwhile, a contract to upgrade more than three-dozen restroom fixtures in the Capitol is ex- pected to go out to bid in January. Ferguson said the estimated $5.8 million cost of the project, stressed that it will be a major project, including re- placement of water and sewer lines in the office building, has been hampered

The Capitol has been located in Charleston since its dedication in 1932.

The project is fully funded with federal stimulus dollars, Ferguson said.

Completion of various land- scaping projects designed to prevent vehicles from driv- ing onto the Capitol grounds.
