**Employer:** Bayer Material Science

**Position:** Fall Co-Op Intern

**Job Description:** Full Time, Internship,

We are looking for a dynamic individual to join the Bayer team who is currently enrolled in a chemical engineering program. Candidates must be available for a Fall Co-Op assignment at Bayer's South Charleston, WV site.

The primary responsibility of this role will be to focus on manufacturing engineering tasks and ongoing projects within the group. The Co-Op position will be in the Polyurethanes Division and will be located in South Charleston, WV. Limited relocation assistance will be provided.

Additionally, throughout this Co-Op program the incumbent will be responsible for:

- Completing small unit projects and processing optimization studies with supervision. This could include piping, valve, pump, or small vessel design and installation;
- Updating unit process engineering documentation (process flow and instrument diagrams or databases).

**Qualifications:** The successful candidates must be high performers who are interested in the pursuing a career in Chemical Engineering who are eager to work with dynamic people and contribute to a changing environment.

- Enrollment in a bachelor degree program with an emphasis in Chemical Engineering;
- Completion of sophomore year or greater;
- Proficiency with Microsoft Office software including knowledge of Microsoft Excel, PowerPoint, and Word;
- Excellent communication skills for interacting with other personnel;
- Attention to detail and ability to learn;
- Ability to work effectively in a team-oriented environment.

Preferred Qualifications:

- Leadership skills demonstrated through involvement in extracurricular or community service activities.
