Employer: MISTRAS

Position: Senior Learning Management System Administrator

Job Description: Full Time, Permanent,

This position provides learning management system (LMS) administration and support, intranet web administration and support, and technical training for T&C faculty, off site staff and students.

The LMS Administrator manages all aspects of the LMS including training, technical assistance and reporting. Troubleshoots complex issues related to the LMS and works with software vendors and IT personnel for resolutions. The position is responsible for the overall LMS system administration and quality and works with content experts to build self-directed web-based training using authoring software. This position works closely with Subject Matter Experts, content developers, the training staff, HR and other departments. It provides customer service for the organization and interfaces with the company counterparts. The LMS Administrator is responsible for day-to-day LMS system webpage design, content and management of T&C SharePoint website, graphics repository and document library.

Major Responsibilities/Activities:

- Provide learning management system (LMS) training and support to T&C staff, off-site training coordinators and end user students.
- Research and resolve LMS functionality issues.
- Collaborate with peers on industry blogs, vendors and at other institutions to determine and facilitate best practices.
- Design and maintain official, accurate, and up-to-date Web and Internet presence.
- Maintain and operate various technologies used in the delivery of instructional and/or interactive programs and courses.
- Provide Level 2 support of computer systems and network problems, including answering questions, providing advice, and troubleshooting. Specifically: assist T&C Helpdesk (Training Administrative Assistants) personnel (Level 1) solve basic technical problems; investigate and seek solutions to complex issues by referring to LMS provider consultant as necessary, and industry best practices to solve problems and enhance LMS performance.
- Give individual or group instruction to users or make arrangements for instruction of LMS software or systems.
