Employer: USDA - Natural Resources Conservation Service

Position: Earth Team Volunteer/Intern

Job Description: Internship,

The Earth Team is the volunteer workforce of the Natural Resources Conservation Service NRCS and we are making a difference in every county in the nation.

NRCS partners with conservation groups and others to ensure private lands are conserved, restored, and more resilient to environmental challenges like climate change. Working side-by-side with farmers and ranchers, the NRCS identifies natural resource concerns, such as soil erosion and water quality issues, and develops unique conservation plans for restoring and protecting resources.

Earth Team volunteers are an integral part of the conservation partnership and each member takes pride in the fact that they maintain and improve our natural resources and environment on private lands.

The job of conserving our natural resources cannot be done by the government alone. We need your help in reducing soil erosion, conserving our water and improving its quality, and developing pride in our country's natural resource heritage.

Qualifications: Earth Team volunteers work side-by-side with conservation professionals. The soil conservationists, technicians, scientists, wildlife biologists, engineers, accounting and administrative staff are all committed to helping people protect and conserve the earth's natural resources.

When you sign up as an Earth Team Volunteer, you are on your way to becoming a caretaker of natural resources in your community. When you volunteer you may assist with improving wildlife habitat, providing conservation education to adults and students, community outreach and many more interesting opportunities.

Whatever your talents or interests might be, there is a volunteer opportunity for you with the Earth Team.

Perferred Major(s): Undecided or None; Associates Degree - Forest Technology; Biology; Chemistry; Education - Middle School Science; Education - Secondary Chemistry (9-Adult); Education - Secondary
