External Tools in Brightspace

How to Link to an External Tool

Many publishers and software products have already been integrated with Brightspace.

Examples include: Cengage, EdPuzzle, Wiley, Panopto, Pearson, OpenStax, Norton, Peregrine, McGraw Hill, Macmillan, Revel, and more.

To be "integrated" means that the software will work within Brightspace and that a link has been created between the two products.

If you know of a software that you would like integrated please make that request. Most company representatives know if their product is able to be integrated with Brightspace.

Software that has already been integrated can be found in one of two locations in Brightspace.

1. First, within the "Content" section of the course, select "Existing Activities". Some of the products can be found here.
