Glenville State Can Be Fun

Glenville State College is a small college with a small town to surround it. However, students manage to have fun without fast food restaurants and a shopping center, unlike many other college towns. One department on the campus of GSC has been planning activities all year long that help students have a good time. Bill Stackman, Pioneer Center director, and his department are the ones who perform this duty. The various concerts in Charleston, ski trips, and rides to the tournament games are just a few of the activities that have been available to GSC students. The big screen television with scheduled movies and the food in the student union are also available to GSC students. Glenville State College is small and with the help of Bill Stackman and his department it is becoming easy to find things to do. The Pioneer Center director and his department deserve a hand for the effort put forth and the success of the activities that have taken place.
