Glenville State College Wednesday 5, 1990 Volume 62 Number 1

## New Fine Arts Building Graces GSC Campus

A week of festivities will ensue as Glenville State College celebrates the opening of their new fine arts building. The events will begin on September 17, at 2:30 p.m. with a dedication ceremony and reception to follow at 3:30 p.m. The public, as well as the campus community, is cordially invited to attend.

The West Virginia Symphony will perform in the new building at 8:00 the same evening. Tickets will become available to students, faculty and staff beginning September 5, in the Fine Arts Building (GSC identification required). The remaining tickets will be available to the public on September 10, at a cost of \$5 per ticket. Tickets may be obtained between 9:00 a.m. and 3:00 p.m. in the Fine Arts Building or by telephone during those same hours (462-7361, ext.350). All reservations will be made on a "first come, first serve" basis. Dress is semi-formal.

The Alumni Center will hold open-house all day Monday September 17, beginning at 8:00 a.m.

A celebration of the GSC Art department will begin with a faculty art show, open to the public from Monday, September 17 through Friday, September 21. A faculty-student art show will be open to all on Tuesday, September 18. The decision to display the artwork in either the foyer or the courtyard of the Fine Arts Building will be

determined by the weather.

The Glenville State College Music Department will perform at 8:00 p.m. Wednesday, September 19. A \$1 charge or donation for Olsen Scholarship Fund will be accepted at the door.

The drama production "Our Town" will be performed on both Thursday, September 20, and Friday, September 21, at 8:00 p.m. Tickets are \$1 for students and \$3 for all others. Tickets will be available between 9:00 a.m.

and 3:00 p.m. in the Fine Arts Building or by telephone (462-7361, ext. 350). Tickets will be open to students, faculty and staff beginning Wednesday, September 5. The remaining tickets will be available to the public on Monday, September 10.

Under the direction of Dusty Rhodes, a well known musician in central West Virginia, "The Band Director's Big Band" will entertain in the Ballroom of the Heflin Center. The big band sound of the '40s will fill the hall on Saturday, September 22, from 9:00 p.m. until 12:00 p.m. Tickets will be available at the door to students at a cost of \$1 per couple, and to all others for \$10 per single and \$15 per couple. Refreshments will be served. Dress will be semi-formal.

Tours of the Fine Arts Building will be conducted Monday, September 17, through Saturday, September 22, from 11:00 a.m. to 2:00 p.m.

## New Fine Arts Building Gives GSC Reason to Celebrate

Glenville State College has a new addition to its campus--the Fine Arts Building. The idea for this building was conceived 20 years ago when it was found that the Fine Arts department lacked the room that they needed. The original idea was to renovate the Verona Maple Hall at a cost of \$800,000. When the Board of Regents turned it down, the next alternative was to renovate or add to the Administration Building. This is where the Fine Arts Department was housed for years, but offered limited space. Dr. Gary Gillespie stated, "The marching band could not practice

together because the room was too small."

President William Simmons, seeing the cramped quarters of the Fine Arts Department, took action to get Glenville State College the much needed building. In 1983 a bonding program was started to get schools the needed facilities. In 1985 the program was approved by the legislature and President Simmons took advantage of the opportunity. Demonstrating the need and the plans for the building, he asked for 6.5 million dollars. The Board of Regents cut the figure to 1.5 million, and President

Simmons related that that would kill the project. Subsequently, Simmons was able to effectively demonstrate the importance of the project--resulting in a 4 million dollar budget approved by the Board of Regents. "I had to become the referee over the one auditorium, but I showed the need for a second," said President Simmons.

This cut of 2.5 million meant that cuts would have to be made in the original plans. A special committee of faculty and staff discussed what concessions would

Con't on Page 11

## Changes In Library Layout

Many changes have taken place over the summer all around the campus of GSC, and the library is no exception. Perhaps the most important change has come in the Government Documents. According to Mr. Rick Tubesing, Library Director, faculty surveys revealed that the needs of the institution could be met better by using the funding for other areas. The faculty surveys determined that only 1% of the Government Documents were being used as References. However, not all of the Government Documents have been taken from the library. Some 2000 books and pamphlets have

been kept. These are in the process of being catalogued and added to the regular collection.

Another change in the library is the re-evaluation of the journals and periodicals. Campus-wide surveys by both faculty and students determined that some 50 journals do not fit the curriculum of G.S.C. However, the library now receives 75 different journals that will be more useful to the curriculum of the college replacing the other 50. More room was made on the first floor of the library to accommodate more student services. This allows materials to be centrally located so that the student services are on one

floor. Space was made on the first floor by separating the periodicals and journals. According to the Library Director the research at GSC most utilizes periodicals or journals published within the past ten years. Therefore, all older materials have been moved to the third floor. Those periodicals since 1980 will still be found on the first floor.

Also the library received \$400 to buy best selling fiction. The Library Director says that computer circulation and a computer card catalogue will be installed at the library.

## Butler Directs Student Teachers

when she assumed her duties at GSC.

When Mrs. Butler joined the staff of Glenville State in the Fall of 1989, she taught early childhood classes and elementary curriculum. She also was Director of the GSC Child Learning Center.

As Director of Field Experiences, Mrs. Butler is responsible for securing and coordinating placement for student teaching, coordinating field experiences offered as class co-requisites, and documenting and verifying those experiences. She also teaches for GSC at the WVU-P campus.

All students in the education field at Glenville State College will become quite familiar with the person in charge of their student teaching placements. Kathy Butler, Director of Field Experiences, is responsible for placing students in the school where they will gain the most valuable student teaching experience.

Mrs. Butler is a 1975 graduate of Glenville State College where she was honored as the Education Student of the Year during her junior year. After graduation, she began her teaching career in Wood Co. with kindergarten and 1st grade classes. Mrs. Butler commented that it was "a real challenge to go from 1st grade to college seniors"

Mrs. Butler devotes her time to other campus-related organizations. She is on the Advisory Board for the Children's Room and the Teacher Review Panel at WVU-P. At Glenville, she is one of the representatives to AACTE and the co-advisor to Kappa Delta Pi.

She is active in the community as well. At the Sand Fork Baptist Church she is the church organist and choir director. When time permits in her busy schedule, baking, country crafts, and cross stitch are favorite pastimes.

Mrs. Butler comes from a family of educators. Her mother, grandfather, and sister are all elementary school principals, and she married into a family of

## Pribble Attends Conference

Dr. Mary Jo Pribble, Professor of Chemistry at Glenville State College, attended the 11th Biennial Conference of Chemical Education held on the campus of Georgia Institute of Technology at Atlanta, Georgia, August 5-9. Participants in the Conference included 1200 chemistry teachers from colleges, universities and high schools from across the United States as well as several other countries.

The plenary lectures included the following: "Future Chemistry: Expanding Frontiers vs. Constrained Resources" by Dr. Mark Wrighton, Chairman of the Chemistry Department, Massachusetts Institute of Technology, "Chemical Education for the International Transfer of Knowledge and Technology." Dr. Aleksandra Karnhauser, International Center of Chemical Studies, University of Edvard Kardelj, Yugoslavia, "Chemical Education in the 1990's: Issues and Opportunities." Dr. Bassam Shakhshiri, Education Directorate, National Science

Foundation.

Dr. Pribble attended sessions on the teaching of inorganic chemistry, general chemistry, organic chemistry and workshops on Microscale Laboratory for General and High School Chemistry and Theory and Practice of Modern I. R. Spectroscopy.

## Tubesing Begins Second Year

Mr. Rick Tubesing is the Library Director and Director of the Library Science program. He just completed his first year at Glenville.

He received his B.A. in English and a minor in anthropology from Yale University, his M.A. in anthropology and archeology at the University of Chicago and his M.S.L. from Western Michigan. Also, he served as an officer in the United States Navy.

Con't on p.12

Formerly, he resided in New Mexico, Atlanta, Chicago, and Toledo. However, he said that his favorite location is New Mexico. In New Mexico he taught at the College of the Southwest. He has also worked at the University of Toledo where he served as Chief Bibliographer and at Lewis University where he was Library Director. While living in Atlanta he was employed at the Atlanta Public Library where he was in charge of the business and sciences collections. Aside from traveling extensively throughout the United States, he has traveled abroad to over twenty countries in Europe, Latin America, and the Orient.

Mr. Tubesing says that he likes the size of GSC because it enables him to get to know both faculty and students. Also at GSC he is able to teach his favorite subject, anthropology, which he is teaching this semester. He hopes to make the library collection reflect the character of GSC.

# New Fine Arts Building

con't from pg. 1

ave to be made.

The final plans were then sent out for bid. All of the first bids were out of the budget, thus, individual parts of the construction: building, electrical, mechanical, were sent out for bid. This process made it possible to bring the project within the 4 million dollar budget.

After the project was started, a soft spot in the ground that was unable to support the building's weight was discovered. Campus capital money was used to cover this unexpected expense.

President Simmons said, "I didn't see the building much until it was almost completed and I was stounded at the beauty. It is breathtaking." When first entering the building, you will be struck by the

architecture of the foyer. There is a 504-seat auditorium and a 104-seat recital hall that has specially designed walls to improve the sound quality. There is a beautiful art gallery, and plenty of classroom space. Mr. Dave Camilletti remarked that the "building contains a state of the art heating and air-conditioning system." Gillespie stated, "In the future, I hope to go through the proper officials to get grant money to buy more equipment."

This new building will improve the college's chances of getting quality students. "This new building will make it easier to recruit students who come from high schools with outstanding art departments," said Dr. Gillespie. "This building will

provide cultural programs in central West Virginia that were not available before. The impact it will have is beyond calculation. This building is a bargain compared to what it will bring central West Virginia," remarked President Simmons.

The new building will house the art, drama, and music departments. It is home to the largest marching band of the four-year colleges in West Virginia. It also houses the largest number of music education students. It is hoped that, with the new building, enrollment will increase.

President Simmons said, "I hope everyone will come and celebrate the dedication."

# Alumni of the Week:

## Dr. Lloyd Elliott

"To work and play and work some more."--Lloyd H. Elliott.

"They stand at attention, obedient, expectant, ready to serve their society with the qualities of fitness that have characterized their college years. Their aim is toward that point in human destinies to which all the glories and of men will lead them--to success (Kanawhachen, 1937)."

Within the ranks of each graduating class stand men and women destined for success and recognition. Some strive for their success and others happen upon it.

Alumni of Glenville State College are among the ranks of today's most successful. This column will be a dedication to their struggles and gains and, perhaps, an encouragement to those of us still working toward our dreams and aspirations.

Lloyd H. Elliott began his career in education after he graduated from

Glenville State College, in 1937, at the age of 18. He became a teacher of language arts and English in both the elementary and high schools in Widen (Clay County), West Virginia. Two years later, after achieving a Master's Degree from West Virginia University, he acquired the position of Principal of the Widen School System.

After serving his time in the military during World War II, Dr. Elliott went on to receive his doctorate in school administration. He held a number of teaching and administrative positions at Cornell University, his last position being Executive Assistant to the President of the university. He later went on to be President of the University of Maine at Orono in 1953. Dr. Elliott remained in that position until he became appointed President of George Washington University in Washington, D. C.

While president of GWU, he was proudest of the three libraries on the campus--a law library, a medical library and a university library. Elliott says libraries are the backbone of any university. Also, he is credited with spurring a tremendous growth in GWU's endowment--from \$8 million to \$200 million, which has allowed GWU to attract teachers from other prestigious universities, such as Berkely and Columbia. He retired from GWU on June 30, 1988.

Upon his retirement, Dr. Elliott became the first President of the National Geographic Society Education Foundation. Elliot has been a member of the board of trustees for 20 years.

## New Intensive English Teacher Hired At GSC

Mary Anne Harrar is the new intensive English program lecturer. She is a 1990 graduate of the University of North Carolina in Greensboro where she studied linguistics and anthropology. Miss Harrar has worked for the last four summers at Wheeling College, Hado International Institute. She has had experience working with Spanish, Japanese, Chinese, and Italian students.

Miss Harrar's interests in English originated from her mother, who teaches intensive English at Wheeling College. A world traveler, Miss Harrar enjoys swimming, shopping, and listening to music.

Her future plans are to get a Master's Degree in English and secondary language. Miss Harrar looks forward to teaching GSC Japanese students and learning more about their culture. Eventually, she wishes to go to Japan and teach.

Apprehensive about coming to such a small town, she soon discovered that everyone is friendly and helpful, which makes her feel at home. She feels that she is going to have an enjoyable year working with people involved with the program.

## Reported AIDS Cases Increase 133%

Proposed funding redistribution under the Health Omnibus Program Extension Act of 1988 (HOPE) will have a tremendous impact on the AIDS Program in West Virginia.

Changing the funding process from a categorical grant to a formula grant, the HOPE act will slash federal funding to AIDS health education and risk reduction activities in the state by an expected 53%. This will be absolutely devastating as West Virginia receives no direct state funding for AIDS prevention because of a presently troubled economy.

"This potentially could wipe us out," said Tom Dobbs, Coordinator of Health Education/Risk Reduction (HE/RR) activities with the state AIDS Program. "Our program has a national reputation for being innovative and creative with few resources. Now, unfortunately, we might see the whole thing go up in smoke."

The proposed formula funding only takes into account a state's population and its total number of AIDS cases. With such a narrow scope, this formula will negatively effect 35 states, the District of Columbia and two U.S. Territories. This bill would cut AIDS education money to West Virginia by more than half in 1991. The District of Columbia is scheduled to suffer a 41% cut in funding although it has the highest HIV infection rate in the country.

"The number of reported AIDS cases has increased 133% (from 67 to 157 cases) since active surveillance was implemented in January, 1989," said Loretta Haddy, Director of AIDS Prevention and Surveillance. "To cut AIDS funding for health educational activities is absurd. This is when we need it most."

"The HOPE funding approach which reduces funding to many rural states is puzzling to health officials since many AIDS experts are stating that AIDS is ruralizing, spreading from large urban centers to rural America," says Ronald Bryant, Coordinator of AIDS Prevention.

The HOPE Bill will affect the following funded components: HE/RR, public information activities, minority initiatives and school AIDS education. It was authorized in 1988 but funds have never been appropriated. The entire bill must be reauthorized in September of 1991, so a level funding provision could be one alternative to ensure states at least maintain current funding for 1991 until a more positive approach can be developed. This bill must still come up for review and pass the powerful Senate Appropriations Committee of which Senator Robert C. Byrd is chairman.

For more information, contact Sarah Bass at the state AIDS Program, 348-2950 or 1-800-642-8244.

## Kathy Butler con't from pg.10

educators as well. Her husband, Dr. Richard Butler, is the principal of Gilmer Co. High School. Two of their children, Michael, 10, and Jennifer, 8, attend Glenville Elementary School. Allison, 3, is at home.

Working with the students at Glenville State College is very enjoyable for Mrs. Butler. She admits, "It's not always been an

easy job, but certainly a fulfilling one." She feels "helping to mold and train individuals to become good teachers has been an exciting challenge...one that I don't take lightly." Mrs. Butler believes Glenville has a reputation for excellence in teacher training, and she is "excited to be part of that tradition."

## Student Teachers Assume Responsibility

Can you be a dedicated, kind, original, stimulating, responsible, poised, confident, fair, and enthusiastic disciplinarian? These qualities and many more are expected to be emulated by education students of GSC as they enter their student teaching experience in the public school system.

Student teaching is the means a student uses to try out, experiment with, and learn from direct application of what has been learned in teacher preparation. It is the culmination of all field experiences at Glenville State College.

For years, students work towards the semester they will be able to apply the knowledge and skills they have acquired in a practical situation. Student teaching provides a supervised environment to "try it out," to learn from a seasoned professional in a real-life situation, and to deal with real children - not textbook stereotypes.

According to Kathy Butler, Director of Field Experiences,

"student teaching is probably the single most valuable experience we provide for teacher education students. It's a hands-on, learning-by doing experience."

The selection of sites and placements of student teachers is not random. Sites are carefully selected so that each student will be provided with an appropriate experience at each level of certification he is seeking. For example, a student majoring in Multi-Subjects (K-4) (5-8) is required to have a student teacher placement in grades K-4 and another in 5-8 to be recommended for certification in West Virginia.

GSC currently has 58 student teachers placed in 13 different counties. Seventeen of those students are in secondary education, while the remaining 41 are in Multi-Subjects (K-4) (5-8). All have been assigned a General College Supervisor who is responsible for evaluating the student teaching performance and for serving as a support/resource person for the teacher. The College Supervisor

works directly with the student teacher and classroom teacher to assure that the placement is a meaningful learning experience. At the conclusion of a successful student teaching semester, a student is recommended by GSC to the WV Dept. of Education for certification.

In early October, Kathy Butler, Director of Field Experiences, will meet with prospective student teachers for Spring 1991. At that time, students will be asked for a 1st, 2nd, and 3rd county preference for their student teaching placements. Counties are then contacted to insure those placements are possible. Prospective student teachers are then notified as those placements are finalized. Spring 1991 student teachers will be informed of their Spring student teaching placements by early December.

## Greek Prices Increase

On or about July 15, 1990 manufacturers and vendors of Fraternity and Sorority souvenir, gift, and insignia items received a letter from Greek Properties, Inc. informing them that several Sororities had joined with this Company to begin charging for the use of their names and symbols on the above mentioned merchandise.

This action was taken without the knowledge of the rank and file members of the respective Sororities.

The end result will be an approximate 20% increase in the prices which members of these Sororities pay for party favors, memorabilia, and insignia items. This, in effect, imposes a "hidden"

tax on members of the respective Sororities.

This "tax" is being imposed by the "hierarchy" of the Sororities and inflicts a monetary penalty on those members who choose to buy merchandise bearing the symbols of their organization.

Unfortunately, unless someone does some "investigative reporting," most of these Sorority members will not realize what is happening and will only "wonder" why they must pay more for their merchandise.

You are encouraged to "check this out" by calling the Licensing Company and/or the National Offices of these Sororities.

## Sudam Hussein: A Look AT The Man

Saddam Hussein, President of Iraq, is a man who has recently become a major media figure. His notoriety escalated after his country's invasion of a weaker neighboring nation.

Hussein, born April 28, 1937, the son of peasants, became an orphan at an early age. He was raised by Khairallah Telfab, his uncle. Telfab was an Iraqi army officer involved in the unsuccessful 1941 coup attempt to overthrow the British rule. Telfab was dismissed from the military and imprisoned following the coup attempt. This may have led Hussein to become a national activist, heavily involved in the elimination of all foreign influences.

Hussein took part in the attempted assassination of Abdul Karim Kassem, the 1959 President of Iraq. Hussein, suffering a leg wound, managed to escape, cutting out the bullet with a pen-knife. Hussein fled the country to avoid a death sentence.

He studied law until Kassem was overthrown and executed in 1963. This gave Hussein part of

his background in influencing people into doing his bidding. Hussein's Baath party took control of the country for a short time. Hussein, imprisoned after a coup overthrew the Party, began reorganizing the Baath party into a revolutionary tool. Upon escape, Hussein went underground and began writing propaganda to support the need for a revolution.

Hussein's militia helped the Baath party take control of the government. Settling for second-in-command, Hussein worked hard on social and economic reforms to get public support. Becoming President on July 16, 1979, Hussein's nightly appearances on television showed him helping farmers and giving candy to children.

By June 1980, Hussein felt secure enough to permit the election of a new 250-member National Assembly. Although Hussein allowed this election to take place, he showed his power by banning most Western news agencies and by stating that a special license was needed to own a typewriter.

Hussein, entering a war with Iran, was confident of a quick victory. His intentions were to bring about a more stable regime that would be more supportive of Iraq. Iran, stronger than he thought, extended the war for years. Hussein negotiated peace with Iran and turned his attention to Kuwait.

Kuwait presented no resistance to his invasion. Hussein now holds complete control over the country and is using foreigners to shield against military retaliation. Perhaps this is a step toward Hussein's policy of no foreign influence in the Middle East.

# Sixteen Faculty Join GSC Staff

**Jonathan Cooper**  
Art Department

**Mary Louise Brown**  
Science Department  
Nursing Coordinator

Glenville State College has sixteen new faculty members for the 1990-91 school year.

Jonathan Cooper is the new art instructor. He is visiting from England on a one-year exchange program. He has degrees from Lowestoft School of Art, Loughborough College of Art and the University of London. He was last employed by the Anglia College of Higher Education as a faculty member of the Arts and Humanities Department.

The Science Department has two new faculty members. Mary Louise Brown is an assistant professor and nursing coordinator. She has a B.S. from the University of Maryland and a MSN from the Catholic University of America. She was last employed at

Shenandoah College and Conservatory of Music in Winchester, VA.

Peggy Romeo is also an instructor in the Science Department. She has a B.S. in Biology from Fairmont State College and a M.S. in Biology from West Virginia University.

Rodney Barker is the new Admissions Counselor in the Admissions Office. He is a 1990 graduate of GSC. He was last employed at Glenville State Alumni Association and Public Relations Center.

Lisa Booth is the new Director of Public Relations. In addition to her responsibilities in public relations, Ms. Booth will serve as the advisor of The Mercury and the Kanawhachen. She studied on the undergraduate and graduate

level at West Virginia Wesleyan College and West Virginia University, respectively. Her last position was Senior Director of Public Relations for United Consumers Club -- a national corporation.

The Athletic Department has several new members.

Charles Bowling is the new intramural director and assistant coach. He has an A.S. from Salem College and was last employed at Lees McCree College.

Steven Harold is the men's track and field coach. He has a B.A. from GSC and a M.S. from Radford University. He was last employed at Radford University--Division of Health and Physical Education.

Dean Hood is the assistant football coach. He has a B.A. from Ohio Wesleyan University and a M.S. from WVU. He was last employed by the United States Merchant Marine Academy.

The Education Department has four new faculty members.

Deanna Foxworthy is an assistant professor. She has a BFA and a teaching certificate from Wayne State University. She received her M.A. from WVU. She was last employed by the Howell Public School System.

Terry Reale is instructing courses in the teacher education program. She has an A.B. in education from Glenville State College and was last employed by the Gilmer County Board of Education.

Brenda Wilson is an assistant professor in the teacher education program. She has a B.A. from

## Free Tutoring

Glenville State College students will provide tutoring free of charge to students in grades 1 through 8 who are having difficulty with reading or math.

The tutoring sessions will meet from 7:00 to 7:45 on Wednesday evenings, starting on September 19 and continuing each Wednesday until November 14 (the Wednesday before Thanksgiving). Each tutor will work with one or two children. During the first session, the tutor will give the child informal assessment tests to determine the area(s) of difficulty. The tutor will then design activities to remediate the difficulties. The remediation activities will be individualized to fit the child's needs. (For example, for a younger child, a 45-minute session may be too long, in which case, the sessions will be shortened with parent approval.) These activities should give a good beginning of the year "boost" to a child who is having difficulty. All activities will be under the guidance of a certified teacher who is experienced in remediation.

For more information contact Brenda Wilson, Teacher Education, Glenville State College, 462-7361, extension 303.

## Graduate School

Juniors and seniors who are interested in attending West Virginia Graduate School can make plans to attend Graduate School Day at the Coliseum in Morgantown on October 1, 1990.

Contact the Office of Career Planning and Placement for further information and registration to have your place reserved in the van.

## U.S. Energy Held Hostage By Iraq

As a result of mass media, most of the nation is aware of the crisis in the Persian Gulf. Troops have been sent overseas and people are being held against their will. While these are the most crucial factors in the situation, the United States is experiencing a dilemma that has not occurred since the early eighties, gasoline prices are beginning to rise. When was the last time you bought gas? The last time I bought gas, the price per gallon was in the vicinity of \$1.20 to \$1.25. Now, the price has increased to approximately \$1.60, and everyone is penny pinching to have enough gas to journey home on the weekends! However, there may be hope in sight. Recently, OPEC approved a production increase that would allow the 13 nations of the

The competency exam for Computer Science, as specified by Policy 5100, will be administered at 3:00 Wed., Sept. 5. Any student who feels he knows the information covered in Computer Science 101 may take this test to receive three hours credit for the course.

Part 1 will include a written exam on terminology and information. Those successfully passing this part will register for Part 2 which involves loading and executing a simple program. Those passing this component may complete the exam in Part 3 which involves writing and running a basic program.

Anyone interested should report to Room 100 of the Administration Building at 3:00 Wed., Sept. 5.

For further details, contact Mr. Ernie Smith at the Division of Business, ext. 241.

## Smith Sworn In

Mr. Gregory Allen Smith was sworn in as president of the West Virginia Association of Land Surveyors at their annual convention at Canaan Valley State Park in April. Mr. Smith is a 1976 graduate of Glenville State College. He served as president elect for the association and has earned the Surveyor of the Year Award which is given to an outstanding surveyor for their contribution to the profession.

Smith founded and currently manages the Smith Land Surveying Company in Glenville. He is married to Judy (Stalnaker) Smith and they have one daughter, Sarah.

## Poetry Contest

The national college poetry contest is open to all college and university students desiring to have their poetry anthologized. Cash prizes will be awarded to the top five poems. Deadline: October 31. For Contest Rules send a stamped envelope to: International Publications, P.O. Box 44044-L, Los Angeles, CA 90044.

## Career Planning

The Office of Career Planning and Placement offers the following services:

- CLEP Testing
- ACT Testing
- SIGIPLUS Computerized Career Assessment
- Personal Counseling Services
- Critical Issues Workshops
- Credentials Files for Students and Graduates
- Placement Records
- Student Health Student Survey
- Resume Preparation Assistance
- Interview Days for Teacher Candidates
- On-campus Recruitment Days for Business/Forestry Majors
- NACEP Testing
- Career Library
- Weekly Job Listing From WVMEN
- Micro-fiche Catalogs of Colleges and Universities
- Military Services Recruiters and Testing
- Registration Materials for GMAT; GRE; NTE; LSAT

Office of Career Planning and Placement  
204-N Heflin Student Center  
Glenville State College  
Jennifer C. Nottingham, Director  
Eleanor Nicholas, Secretary

Returning students have undoubtedly noticed the many changes that are taking place on campus. Moving offices, renovating buildings and switching classrooms are among the changes to take place this school year. These changes are part of a plan to make the college more functional for students and faculty. Mr. Hathaway, the director of the maintenance department, has an evergrowing list of requests from the various departments on campus. The list includes everything from minor repairs to major renovations.

Mr. Camilletti, financial assistant to President Simmons, and Mr. Hathaway analyzed the space, facilities, and location of each building on campus to develop a plan which will open dorm rooms for students, centralize the departments on campus, and fulfill many of the requests given to Mr. Hathaway. The administration received the plan, made minor changes, and then approved it.

Heflin Student Center is to house only student activities not related to academics such as food service, The Mercury, Student Congress and the Book Store. Eventually the Book Store will be enlarged including a used book section. Recreational facilities in Heflin Center will be improved and made more accessible. The Education Division will be centralized in a newly airconditioned Clark Hall. To open up dorm rooms for students, the Business Division is moving from Pickens Hall to the Administration Building basement. Our college business offices will move from the Administration Building into the section of Louis Bennett.

The purpose for these changes is to reduce operational expenses to save students money. Our small but efficient maintenance staff is doing as much work on these projects as possible so the College is not forced to hire expensive outside construction.

## Look into the: Marketplace

There is a widespread demand for teachers in science, mathematics, computer science, special and bilingual education. A report taken from a 1989 teacher supply and demand report sponsored by the Association for School, College and University Staffing (ASCUS), shows which areas of the country are in most need of teachers and which teachers are highest in demand.

Also, a table of salaries is provided to show which states pay teachers more and which states pay teachers average or below average pay. West Virginia was ranked 51st and Alaska was ranked 1st on this report.

Top Ten States in Teacher Salary		The Ten Least Paying States	
1. Alaska	\$27,310 b	1. West Virginia	\$15,055
2. California	\$23,922 b	2. Idaho	\$15,252
3. New York	\$23,000 c	3. South Dakota	\$15,346
4. Hawaii	\$22,298	4. Utah	\$15,409
5. Connecticut	\$22,276	5. North Dakota	\$15,600
6. D.C.	\$21,357	6. Louisiana	\$15,648 a

# Tomato Takeover

Glenville resident Nick Nicholson is the proud owner of a mammoth tomato plant. Planted in June of this year at Nick's Camden Flats residence, the Oxheart plant has reached an approximate height of 12 feet, and bears heart-like fruit the size of softballs! Nicholson said the average height of this type of tomato is a mere three feet. That makes his plant four times larger than the normal, garden variety.

He acquired the plant in a group of like flora from another Glenville resident, Albert Moore. Moore also planted Oxheart tomatoes. His plants however, did not sprout to such outrageous heights! Neither Nicholson nor Moore can explain the extreme growth of the plant, for Mr. Nicholson did not do anything special to enhance the maturity of this particular Oxheart. In fact, when asked to comment on the situation, Nicholson replied, "It was just a scraggly little thing, I didn't think it would make it. I almost threw it away. Instead I decided to plant it in my wife's flower bed."

Plant it he did, and grow it definitely did! Using everything from an old broken broom handle to a child's toy spear, Nicholson

now resorts to tying wooden stakes together to keep the plant vertical.

So a word to the wise: If you are driving in the Camden Flats area and happen upon a house overcome by a fruitful vegetation, do not panic for it is not the Attack of the Killer Tomatoes II. It is only Nick Nicholson and his outrageous Oxheart!

Debra Simon is an assistant professor in teacher education. She has a A.B. from GSC and a M.A. from WVU. She was last employed by the Lewis County Board of Education.

Phillip Rossano is the new assistant professor in the Fine Arts Department. He has an A.B. from Fairmont State College and a M.A. from West Virginia Wesleyan College. He was last employed at Salem College.

Paramdath Luthmansingh is an assistant professor in the Land Resources Division. He has a P.H.D., M.S.C., and a BSC from Pennsylvania State University. He was last employed at Penn State University, State College, PA.

The new housing administrator is Terri Dugan. She has a B.S. from Bethany College. She was last employed by the Student Services Offices at Bethany College.

The Intensive English program has a new lecturer, Mary Anne Harrar. She has a B.A. from the University of North Carolina in Greensboro, NC. She was last employed at Wheeling Jesuit College in Wheeling.

## Hechler Reminds Voters

Secretary of State Ken Hechler is coordinating a statewide voter registration drive, keyed to a daily "countdown" to the October 9 deadline -- the last day to register to vote in the November 6 general election. Business, labor, education, and other public interest groups will join in kicking off the countdown with a news conference scheduled for 10:30 a.m., September 6, in the Secretary of State's office.

"Out of about 1.3 million West Virginians over 18 years old and eligible to register, it is shocking that only 881,602 people in the State have actually registered. This means that over 400,000 West Virginians of voting age haven't even bothered to register," Hechler noted. "Only through a thorough grass-roots effort will we be able to convince all these drop-outs that they have a real stake in shaping

the future of West Virginia," he added.

Joining in the countdown drive will be the League of Women Voters, Chamber of Commerce, West Virginia Labor Federation, Farm Bureau, Democratic and Republican State Committees and their youth affiliates, and many other civic and professional organizations. "We hope to extend this drive to schools, colleges, and universities and to stir the conscience of every unregistered West Virginian," Hechler said.

"This countdown drive will only succeed if every group, every employer, every employee, and every institution takes it upon themselves to devise and carry out their own programs to insure that everyone is registered. We must make this a great countdown for democracy," Hechler concluded.

## Pioneers Fall to Wesleyan

Glenville State opened a new era of football Saturday as they traveled to Buckhannon, and lost a hard fought contest to nationally ranked West Virginia Wesleyan College.

The season opener saw Wesleyan outscore the Pioneers 30-7 in what was a much closer contest than the final score indicates.

On a squad returning only twelve starters, eight on offense and four on defense, the Pioneers took their first step towards rebuilding a program under first year coach Rich Rodriguez.

Wesleyan opened up the scoring in the first quarter on a 31 yard field goal by Doug McMillin.

With Wesleyan up by three, Wesleyan senior Mike Baird caught a 6 yard touchdown pass from quarterback Dan Ritter to put the Bobcats up 10 to 0 at halftime.

The second half opened with the same Baird to Ritter connection, as the duo scored on another 6 yard scoring play. On the failed extra point attempt, Wesleyan lead 16-0.

Wesleyan later scored on touchdown runs of 16 and 2 yards respectively, as they held a 30-0 lead late in the fourth quarter.

Pioneer senior Frank Myers, who rushed 13 times for 85 yards, gave Glenville State their only trip into the end zone as he scored on a

1 yard touchdown run.

On the day, the Pioneers had 233 yards of total offense, 103 yards rushing, and 130 yards passing. Myers was the leading Pioneer rusher with 85 yards, Terrence McGee led all Pioneer receivers with 42 yards on four receptions.

Leading the Pioneer defense charge was sophomore Frantz Pago with 10 tackles. Other defensive standouts were Rodney Fox and David Keaton, each with nine tackles.

Glenville State has an open date Saturday, before they host the Shepherd College Rams on September 15 at 1:30. It will be the

# HART'S HEADLINES

Well Pioneer fans, its that time again. Suitcases are unpacked, classes have begun, and Pioneer football is in full swing.

Pioneer Football has entered a new era, as the days of Lou Nocida are gone. With newly installed head football coach Rich Rodriguez, the 1990 season opens with a sense of hope and excitement.

Rodriguez has not only installed a new weight room, new uniforms, and a much improved field of play, but he has restored pride in the hearts of Pioneer faithful everywhere.

As the new era begins, we need to put the problems of the past behind us. Everyone wants to see a successful Pioneer football team, and the changes have been made to reach any goal possible.

All through the spring and summer the newly appointed coaching staff along with the players and trainers have been working hard to bring the pride back to Glenville State Football.

Now comes your job, the job of the fans. All of you chose to come to Glenville State College for one reason or another. You are not in high school, you chose to graduate, or did you forget? The era of the 1990s has begun, but in order for a successful Pioneer football squad to emerge, the players and staff need time and an unlimited supply of support.

All last season I listened to the complaints about a team that went 1-8. Well, all your complaints have been heard and answered. Now, I call on you to attend all Pioneer football games. Talk optimistically and bring pride to the Pioneer campus again.

I challenge all freshmen to support Pioneer athletics. This is your school now, and it will only be what you make of it. Let's all stick together and help make Glenville State College Pioneer Proud!

Coach Rodriguez gives instructions to Aaron Simpson

Senior Tammy Pence-Hughes

## Lady Pioneers tune up for opener

Second year head coach Kenny Osborne, coming off a disappointing 1989 campaign, is very excited about the upcoming 1990 volleyball season.

Osborne feels he has a good group of returning lettermen to go along with an excellent group of newcomers.

Returning from the 1989 squad are senior Tammy Pence-Hughes, juniors Tami Simons, Julia Wood, Katsuko Nakata, and sophomore Jane Firl. These returners will be joined by newcomers Belinda Dowler, Jennifer Crimm, Nikki Hardman, Stephanie Ferrell, Stephanie Graves, and Kim Sees.

Osborne feels that for the Lady Pioneers to be successful, they must have great play from Pence-Hughes and Simons. Coach Osborne is

quick to say he believes Pence-Hughes is the best player in the West Virginia Conference, while Simons gives the Lady Pioneers much needed leadership on the court.

Stressing the importance of team play, Osborne stated that the newcomers will have to play a vital role in stepping up their game. The success of the team depends on backrow play and sets from the newcomers.

As the season progresses, Osborne feels his team will be much improved. "The squad has practiced hard and have pulled together as a team," states Osbourne.

The Lady Pioneers begin regular season play Tuesday, September 11 at the University of Charleston.

## Cross Country Team Prepares For Distance

Glenville State's Cross Country team is one week away from their season opener at West Virginia Wesleyan, but that didn't stop a few dedicated runners from competing on their own.

In turning up for the West Virginia Wesleyan Cross Country Invitational, to be held September 8, several Pioneers headed to Pennsboro, West Virginia where they competed in the 11th annual Country Roads Festival Road Run.

The 10-mile and 3-mile events saw two Glenville State Harriers capture first place titles. Senior Mickey Grass captured the overall individual championship after being the top male finisher in the 10-mile run. Junior Katrinia Riggelman finished first in the 3-mile run; 20-29 age group. Glenville Lady Harriers Tracy White and Jane Hoffman finished second and third behind Riggelman respectively.

Mickey Grass

## SPORTS TRIVIA

1) What collegiate football team holds the record for the longest unbeaten streak?

2) What professional football player holds the record for the most points scored in a Super Bowl?

3) What former Portland State University quarterback holds 90 NCAA football records?

4) What two teams played in the first televised football game?

5) Who holds the record for the longest field goal in NFL history?

## Pioneer Golf Team Rebuilds

Coach Tim Carney, a veteran coach of twenty-three years, is coming off his best season ever.

In the spring of 1990, Carney's squad finished eleventh in a field of thirty-three at the NAIA National tournament. The NAIA National Championships were held at Angola, Indiana during the third week of May.

Playing on the 72-par Zollner Golf Course, Senior Bob Sowards carded a course record 5-under par 67 on his way to a 12th place finish. The 12th place finishing allowed Sowards his 2nd consecutive All-American status.

Also finishing well for the Pioneers was junior Greg Tallman. Tallman finished in the top 30, allowing him to earn All-American honorable mention.

Although the Pioneers are coming off their most successful spring campaign, their losses for the fall are great. The Pioneers lost two of their top three players, in Sowards and Patrick Geraghty. Sowards completed his eligibility at Glenville State, while Geraghty transferred.

Don't count the Pioneers out in the fall. With four returning starters and two newcomers, Carney will have a competitive squad ready to compete again in the spring.

The fall schedule consists of four tournaments that are preparatory meets for his squad. Every year Coach Carney uses the fall season to evaluate his golfers and prepare for the ever-important spring season.

As the 1990 squad continues to develop, we wish them luck and much continued success.

Bob Sowards 2-Time All-American

# Jostens Establishes Grant Program

Jostens Learning Corporation has announced its \$3 million Challenge Grant Program in the state of West Virginia. The program is designed to encourage partnerships between West Virginia schools, businesses and community organizations. Each school choosing a Jostens Learning solution will be awarded an \$80 grant per student station. The challenge is extended to the local business communities to become partners with the schools by contributing matching funds and investing through education in the economic future of West Virginia. "This is a great way to promote economic growth in the state," said Burl Hogins, co-founder and senior vice president of Jostens Learning. "By investing in today's students, we invest in West Virginia's tomorrow."

The new Challenge Grant Program follows an announcement last month by West Virginia Governor Gaston Caperton, who unveiled a \$70 million, ten year plan to provide comprehensive computer-assisted instruction (CAI) to West Virginia schoolchildren. Jostens Learning, the largest educational software company in the United States, was one of two vendors selected to provide software and hardware for the governor's plan.

The Challenge Grant Program is the result of Jostens Learning's total commitment to the governor's Basic Skills program, to long-term

education solutions and to community partnerships. Such partnerships have been very successful in other areas where Jostens Learning has helped schools join forces with business to send computers home with at-risk students for extended school day learning with their families.

The governor's program will serve students in West Virginia schools by addressing basic skills needs in reading, mathematics and writing, as well as computer literacy, remediation and accelerated learning. West Virginia educators will implement the plan in three phases, beginning in grades K-1.

The Challenge Grant Program will extend to each of the three phases. Funds from the grant and from business partnerships can be used to expand the schools' Computer Learning Centers to other grade levels, or to include a broader curriculum through additional Jostens Learning programs, all of which can be purchased by schools at the state contract price. Jostens Learning, the leading provider of instructional technology solutions, has installed in over 5000 U. S. schools computer-assisted instructional systems developed by educators who understand the variety and scope of the needs of today's students.

For the West Virginia business community, the Challenge Grant Program offers the opportunity to support education reform, and help

strengthen West Virginia's economic prospects for the future, the primary objectives of the governor's Basic Skills program.

"The future starts now," said Hogins, co-founder and senior vice-president of Jostens Learning. "We know that West Virginia will rise to the challenge."

## Research Opportunity at National Laboratory

Are you studying computer science, engineering, physics, environmental and life sciences, mathematics or chemistry? If so, you may be interested in the Oak Ridge Science and Engineering Research Semester (ORSERS). ORSERS is offering college juniors and seniors an opportunity to do hands-on research at Oak Ridge National Laboratory (ORNL) in Tennessee during the academic year.

ORSERS is part of a nationwide effort by the U.S. Department of Energy to increase the quality and quantity of students preparing for careers in science, mathematics and engineering and is managed by Oak Ridge Associated Universities, Oak Ridge, Tenn. Participants become members of research teams engaged in long-range, intensive investigations employing advanced facilities and equipment. Fields of study include artificial intelligence, biomedicine, chemistry, environmental and life sciences, computing and telecommunications, physics, mathematics and engineering.

While the emphasis of the program is on hands-on research, ORSERS also includes an educational enrichment component. Participants attend seminars and symposiums sponsored by the divisions at ORNL and have the option of enrolling in a laboratory-approved course at the University of Tennessee, Knoxville or other nearby colleges. Students are also encouraged to arrange for the granting of academic credit by their home institutions for the research semester.

According to National Science Foundation studies, by the year 2000 the United States will not have enough scientists and engineers to meet its needs. "Manpower projections for all types of scientists and engineers show the future demand for these specialists to be much greater than the supply," says

Your group can utilize this space for only \$5.25 in the next edition of The Mercury.

## Poetry Contest

The deadline for the American Poetry Association's contest is September 30. The contest is open to everyone, and entry is free.

The Grand Prize is \$1,000, and the First Prize is \$500. There are 152 prizes worth \$11,000 in all.

"Every student who writes poetry should enter this contest. The judges look for new and unknown poets, and students often win," said Robert Nelson, publisher for the association. "You don't have to be a professional poet. Your sincerity, originality and feeling are what the judges look for."

Poets should send one original poem, no more than 20 lines, name and address on the top of the page, to American Poetry Association, Dept. CO-84, 250-A Potero St., P.O. Box 1803, Santa Cruz, CA 95061. Entries must be postmarked by September 30. A new contest opens October 1.

Each poem is considered for publication in the American Poetry Anthology, a treasury of current verse.

Entrants receive the "Poet's Guide to Getting Published," a four-page booklet full of information every poet needs to know.

The American Association has sponsored poetry contests for 8 years and has awarded \$200,000 in prizes to 3,400 poets.
