Raymond A. Oliverio

Oliverio Charged With Development

Raymond A. Oliverio, a Clarksburg native, is the newly appointed Director of Institutional Development at Glenville State College. Oliverio began his position, which was appointed by President William K. Simmons, on December 3, 1990.

Previously employed as a Public Affairs and Government Relations consultant in Washington, D.C., Oliverio brings 27 years of experience to the position. Oliverio was made aware of the opening at Glenville State College through Philip Reale, former Chief of Staff to Governor Gaston Caperton and currently Executive Vice-President of Vaco Oil and Gas. "I'm excited

about formulating a development program at this institution," said Oliverio. "It is exciting because in many respects the College is undertaking a new initiative and one which will play a key role in the future. I look forward to working for the Alumni Foundation, Glenville State College and in close cooperation with the Alumni Association and the fine people of Glenville. Together we can move forward in the initiative for the betterment of Glenville State College," offered Oliverio.

Oliverio is the son of Mr. and Mrs. Pete R. Oliverio of Homor Avenue, Clarksburg.

by Sheryl Short

After more than five months of occupancy, Iraqi President Saddam Hussein failed to yield to economic sanctions and world condemnation and withdraw from Kuwait by the January 15 deadline imposed by the United Nations. In keeping with the threat to use military force after this deadline, American F-15E fighter bombers along with British Tornados and Saudi Arabian F-15's and Tornados left the largest U.S. air base in central Saudi Arabia to begin air attacks on Baghdad, Iraq at approximately 4:50 p.m. EST January 16. This attack marked the beginning of what is now being termed "Operation Desert Storm."

Almost exactly 24 hours after the first allied attack on Baghdad, Iraq chose to retaliate by bombing Israel with Scud missiles. Whether or not Israel will respond militarily to these bombings has yet to be decided.

The latest Iraqi attack

occurred Sunday, January 20 when 10 Scud missiles were fired at Saudi Arabian targets. As of 6:45 a.m. EST, January 21, no missiles had actually landed in Saudi Arabia due to interception by U.S. Patriot anti-missile missiles. These missiles were developed as a part of former President Ronald Reagan's Star Wars Program.

Twenty-three prisoners of war were captured by allied forces during a raid on oil platforms in the Persian Gulf on Saturday. The Iraqis are claiming to also have POW's and have been asked to follow the laws of the Geneva Convention which call for the humane treatment of POW's. But Saddam Hussein has stated that American POW's will be used as human shields against future attacks. In addition, the supposed captured pilots have been displayed on Iraqi television condemning the war effort in what appears to be a forced reading. The pilots identified

themselves as Marine Lt. Col. Cliff Acree, Navy Lt. Jeffrey Norton Zaun, and Marine Chief Warrant Officer Guy Hunter, Jr. who were listed as missing by U.S. officials.

As for the success of the allied missions so far, General H. Norman Schwarzkopf, commander of the U.S. forces in the Persian Gulf, reports that approximately 80 percent of the military targets have been destroyed or disabled including four primary nuclear research facilities. Also, the U.S. Air Force has flown 7,000 sorties and downed 15 Iraqi aircraft.

The number of casualties has been low with only one American death and 12 persons missing in action. In terms of equipment, only eight U.S. aircraft have been lost since the beginning of the war.

How long the war will last cannot be determined, but the latest estimates are given in weeks rather than in days.

Dr. Joseph Mace Addresses Future Educators at Glenville State College

In December, Dr. Joseph Mace addressed the students of Debra Simon's Education 311 class. Dr. Mace, Superintendent of Lewis County Schools, spoke to the prospective student teachers on topics that would be beneficial to them as professional educators.

He began by telling the students the importance of the application procedure: applications make first impressions so be sure to submit one that is complete and error free. In accordance with this, after obtaining a position, Dr. Mace stressed the importance of punctuality, familiarity with school

law, and maintaining a professional appearance.

The Superintendent explained the necessity of knowing your content area as well as the need to explain the basics to students so they may move on to more complex topics. Teachers must also take the time to help students who are need of assistance.

Dr. Mace discussed the role Faculty Senates could play in the selection of new teachers in a county as well as the pros and cons of the grievance process that is found in the school system.

In reference to the

upcoming field experiences of the students, Dr. Mace suggested those students entering this phase should be courteous to their supervising teachers and not be quick to question someone who has experienced the job outside of a field experience setting.

Dr. Mace concluded his address with remarks concerning the low availability of teaching positions in West Virginia. He also stated that the teaching experience is different in every school and finally, if you don't like children, don't enter the profession.

Pop Music Creates Its Own Controversy

by Tracy Samples

Madonna has always been a master of controversy, but perhaps she is merely a musical trend setter. Madonna's latest release, "Justify My Love," has been bouncing all over the airwaves. But the song's video is encountering some problems.

The video contains scenes of explicit sexual activity, which even features exposed female nipples, transvestites, and several other unmentionables. Even MTV, which frequently runs anti-censorship commercials, (one done by Madonna herself), rejected the video.

Would this song have made it to the charts if the video had not created such a fuss? Is today's music for music's sake or does it take a controversial ingredient to make a song popular?

New white rapper Vanilla Ice, whose real name is Robert Van Winkle, created an entire fictional history for himself by claiming he grew up on the streets of Miami and won three motocross championships. Ice attributed his rap writing ability to his street life exposure when actually he grew up

in a white, middle-class suburb of Dallas and never once won a motocross championship.

Entertainers have often depended on circumstances, good or bad, to carry their music to the top of the charts. John Cougar Mellencamp used the American farmers' plight for the basis of his "Rain on the Scarecrow" record, which dwelled on the loss of his grandfather's Indiana farm taken by the bank for collateral.

Pink Floyd's "The Wall" had a reincarnated profit when the Berlin Wall was torn down this year. Prince's 1999 album will most likely receive second time recognition near the year 2000.

Musical exploitation is a common denominator among many successful entertainers. Perhaps the Persian Gulf conflict will spark some musical compositions. U2 or Bruce Springsteen could very well shoot a video on the battle torn streets of Kuwait. After all, somebody has to benefit from the violence, why not the music industry?

Depletion of the Ozone Layer Threatens Everyday Life

FACT - The ozone layer protects the earth from harmful ultraviolet rays of the sun.

FACT - The ozone layer is disappearing at a rate of three to six percent annually.

FACT - The depletion of the ozone layer could have a devastating impact on life on the planet.

Several years ago the public became aware of a so-called "ozone hole" above Antarctica. People around the world began to realize the protective layer surrounding the earth was in danger of being destroyed. Only now, after years of abuse, are questions being raised on what effect the destruction of the ozone layer will have on earth and its inhabitants.

In recent years the global scientific community has concentrated its efforts heavily on studying the causes and effects of ozone depletion. General consensus has been reached among scientists on the causes of ozone depletion of which the largest is the use of chlorofluorocarbons (C.F.C.'s). These C.F.C.'s are found in a wide range of products ranging from aerosol cans to styrofoam. Aside from C.F.C.'s, scientists point to the

burning of fossil fuels, such as oil and coal, as a major factor causing damage to the ozone. When fossil fuels are burned, carbon monoxide, an ozone depleting compound, is released into the atmosphere.

Scientists, however, are not in agreement on what affects ozone loss will have on the planet itself. The affects of ozone loss are varied and quite frightening. Perhaps the most pronounced danger is that of the sun's ultraviolet rays entering the atmosphere. These U.V. rays cause various health problems ranging from skin cancer to cataracts. They may also be linked to a weakening of the immune system.

Aside from health factors, other scientists warn that the global climates could be severely affected. *Science Magazine* suggests that the effects of ozone loss are already affecting both the north and south poles. Since these regions play an important role in global climate patterns, many scientists fear the pollution affecting these regions could be devastating for the entire world.

What can be done to protect the ozone layer? A United

Nations conference was recently held and over 50 nations agreed to ban C.F.C.'s by the year 2000. Other than this conference, no action has been taken to protect the ozone. It is a global problem and it will take global cooperation to save the ozone from being destroyed any further. Two of the biggest things we can do are to try to avoid styrofoam and aerosol cans. There are generally alternatives to these types of packaging and they generally cost the same. By purchasing cleaner burning fuels for your automobile, the amount of carbon dioxide released into the atmosphere is reduced. These may seem like minimal and unimportant things but they really do make a difference. One styrofoam cooler can eat up to two feet of ozone and your car can put out about one ton of carbon into the air every year.

There is still time to protect and save the ozone layer. But the longer we wait the less there will be to save. According to the *Los Angeles Times*, a delay of one year in protecting the ozone will delay the ozone's recovery by an additional five to ten years.

Student Standout:

Tonja Clark

by Sally Smith

Tonja Clark, a computer science and information systems major, is a senior from Spencer.

Originally, Tonja attended Marshall University, where she obtained a two year degree in computer technology. She decided to further her education and chose Glenville State College.

While attending GSC, Tonja has been involved with many activities. She holds the position of secretary for PBL and the computer club, is a dorm representative for Student Congress, is a member of Pickens Hall governing board, and is a past president of the Ladies of the White Rose.

Tonja was also selected as an Outstanding College Student of America at Marshall and was Senior Homecoming Princess during the 1990 Homecoming at GSC. She is also a Resident Assistant at Pickens Hall. In her spare time, she enjoys shopping, swimming, and walking.

As graduation approaches thoughts of future plans are in order. When asked what she hopes the future may hold for her she replied "Obviously to get a job first where I can move up the ladder. Perhaps as a director of a systems analysis department."

Editorials

Clancy Article Questioned

Dear Editor:

Appearing in the December 5th edition of the Mercury was an article by Tom Clancy, reprinted from the Los Angeles Times, concerning the Persian Gulf Crisis. The opinions expressed therein consisted of standard right-wing conservative pap and although clearly editorial in nature, you chose

to print it as hard news rather than on the "Opinion Page."

All students at GSC pay a student activity fee which, at least in part, funds the printing of The Mercury. Consequently, each student shares in the role of publisher and as such, also shares in a multi-faceted group consciousness which should be afforded more than a single, myopic point of view.

I would suggest if, in the future, you intend to print editorials of such obvious demagoguery they be clearly labled as opinion and appear alongside an appropriate airing of the opposing perspective.

Sincerely,
Bobby Updegrave
Chloe, WV

Ralph McGill Scholarship Fund

The Ralph McGill Scholarship Fund, a memorial to the late publisher of The Atlanta Constitution, offers scholarships to those who have completed at least two years of college and who have demonstrated an abiding interest in the news and editorial phase of newspapering.

Scholarships are limited to those young men and women whose roots lie in the South. Applicants must convince the awards committee that they firmly intend to pursue a career in daily or

weekly newspapering and that their interests and aptitudes are such that they are likely to become leaders in this field.

Awards for the upcoming scholastic year will be for the third or fourth year of college. A "B" average will be required to maintain the scholarship. Awards will be in an amount not to exceed \$2,000 for the school year. A 500-word letter along with a photograph of the applicant must accompany each application giving reasons for seeking a Ralph McGill Scholarship.

Applications also must be accompanied by a letter of recommendation from a college authority, and an official transcript from the college.

The Ralph McGill Scholarship Fund is supported by grants from the Cox Foundation and other contributors.

Application blanks may be obtained from The Ralph McGill Scholarship Fund, P.O. Box 4689, Atlanta, GA 30302. The application deadline is May 1.

Bame Attends Teachers' Convention

Ralph J. Bame, an Associate Professor at Glenville State College, attended the regional National Science Teachers Association (NSTA) Convention in Washington, D.C., December 13-15, 1990.

Mr. Bame toured the Washington D.C. area with noted author and paleontologist Peter Krantz. He collected rocks and fossils from the piedmont and coastal plain.

He also received training from the Environmental Protection Agency's Pilot Program entitled "Groundwater for Science Education Project." Mr. Bame is now qualified to teach three modules centered around aquifer protection, leaking storage tanks, and Super Fund.

Over 5,000 science teachers, scientists, and well-known personalities convened in Washington, D.C. for the NSTA meeting which featured presentations by Allan Bromley, Assistant to the President for Science

and Technology, Office of Science and Technology Policy, Washington, D.C.; Lynn Margulis, Professor of Biology, University of Massachusetts, Amherst; and Joseph A. Fernandez, Chancellor, New York City Public Schools, Brooklyn, N.Y.

NSTA Conventions give science teachers in elementary, high school, and college an opportunity to come together to exchange ideas about how to most effectively use our resources-human, natural, and financial-to communicate the value and meaning of science to Americans.

Founded in 1944, the National Science Teachers Association is the world's largest professional organization dedicated to improving science teaching at all levels-pre-school through college. The NSTA's current membership of nearly 50,000 includes science teachers, science supervisors, administrators, scientists, representatives of business and industry, and others interested in science education.

OPINION POLL

On January 15, 1991, a survey was conducted of students, faculty, administration, and staff. One hundred-fifty people were asked the following question: "Do you support the use of force against Iraq, are you totally against it, or are you undecided at this time?"

Support - 79/150 or 53%
Against - 33/150 or 22%
Undecided - 38/150 or 25%

CAPS AND GOWNS

Attention May Graduates! Caps and gowns must be ordered by February 1 by contacting the Alumni Office in the Alumni Center. Graduation announcements must also be ordered at the Bookstore by February 1. The last day for making application for May graduation is February 8 at the Registrar's Office.

Support the Soldiers in the Middle East

by Kristi Rogucki

The new spring semester has brought many changes to not only Glenville State, but to the world. While GSC students are bothered with changing schedules, soldiers in the Middle-East are concerned with staying alive.

Many are comparing the war in the Persian Gulf to the war in Vietnam. Like the Vietnam war, many are not sure why the United States chose to become involved in a conflict that appears to hold little strategic value. Others feel the United States could respond to Saddam Hussein's takeover of Kuwait in no other way. This difference of opinion is allowed in the United States. These two points of view may coexist without contest, for it is one of the many rights guaranteed to people of the United States. If you choose to join in the anti-war demonstrations to protest a war you believe is being fought solely for the purpose of economic gain, you may do so. If you choose to rally around the flag in support of the U.S.'s "liberation of Kuwait" you may do this as well for it is your human right to do so. Perhaps this right is one of the many reasons the U.S. entered the Gulf War.

The soldiers who are now in the Persian Gulf need your support. These men and women are exercising their rights by contributing to what they believe to be a just cause. Give them your support, and hope for the day when they will all come home safely.

Chup Robinson as John Wayne with Kolisch

photo by Tina Messenger

GSC Hosts Hypnotist

by Lori Burton

Special entertainment livened the spirits of many students on GSC's campus last Wednesday evening when the Amazing Kolosch performed in the auditorium of the Fine Arts building.

Gary Messenger, President of Student Congress, announced the Amazing Kolisch who then began the eventful evening by enlightening the crowd on how hypnotism is performed and the many advantages of it. For example, one can be hypnotized to lose weight, quit smoking or even improve study habits.

The Amazing Kolisch, who has over 25 years of experience in the world of "showbiz," has rightfully earned the title of World's Fastest and Foremost Hypnotist. He has performed on such shows as the CBS special *Body Human*, *P.M. Magazine*, and *The Tonight Show*.

Kolisch asked for 20 volunteers from the curious and excited audience who willingly rushed to the stage. Several of the volunteers kept the crowd on the edge of its seat anticipating what was going to happen next.

Chup Robinson was the first to go under the Amazing Kolisch's spell and proved hypnotism really works by doing a

great impression of John Wayne and Andrew Dice Clay. Ed Kowchuck, at the approximate weight of 170 pounds, was lifted from a sitting position by four people using only two fingers each. Linton Turner brought the crowd to its feet when he rapped to the rhythm of his own beat.

Next, Alicia Hess sang to a different beat when she keyed a high note giving the crowd her rendition of how Opera music should sound. Brian Fisher reeled in such a big fish he fell right out of his seat only to find out he'd caught a stick of wood instead. Tony "I can't remember my name" Minatta had a hard time picking up his I.D. when he was told it weighed a ton. All of the students hypnotized performed the hoola dance, ice cream eating contest, hiding money and changing from hot to cold.

After the show, Kolisch stayed to answer questions and to satisfy curiosity. The students enjoyed the Amazing Kolisch's performance and would like to invite him back again next year.

*Meet me half way,
you need the exercise.*

Social Science Division Adds New Associate Degree

photo by Tom Armstead

Andrea Stanley

by Sheryl Short

An associate degree in criminal justice has been added to the previous list of degrees available through Glenville State College.

According to Dr. Lowell

photos by Tina Messenger

John Dotson

Peterson, Vice President of Academic Affairs, plans to add this program have been in the works for a long period of time. Recent events, such as the planning of a regional jail in Braxton County and

discussions of the possibilities of prisons being constructed in Gilmer County and Spencer, have prompted the addition of this degree.

Currently, Andrea Stanley, who has B.S. degrees in criminal justice and social work from Bowling Green State University in Ohio, is teaching the Introduction to Criminal Justice class at 8 a.m. WV State Trooper John Dotson is teaching the night class Police and Community Relations. The Criminal Law course is being taught by Dr. Wesley Phelan. One other course, Criminalistics, is available via satellite.

The Social Science Division will be placing an ad for a full-time coordinator for the criminal justice program to begin work in the fall.

Teacher Education Committee Provides New Programs

by Lori Burton

The new programs available to us here at Glenville State College would not be possible if it were not for the Teacher Education Committee. The members of this committee are those who consider and act on these programs.

Other duties of this committee are:

1. to consider and act upon revisions of programs
2. to propose and make recommendations regarding requirements for certification in various programs
3. to make recommendations regarding content of general and professional education programs required for certification.
4. to initiate and recommend policies relative to the admission of students to the teacher

education program

5. to recommend policies regarding student teaching

6. to study and make recommendations concerning all facets of teacher education

7. to evaluate existing programs

The members of this committee are: the vice president of academic affairs, the dean of teacher education, the chairperson of each division in which a teaching

specialization exists, the director of field experience, one faculty member from each division of departments offering a program in teacher education, five public school administrative and instructional staff persons (from at least three counties) and three students. These students are Becky Hall, Michelle Jordan and Cathy Hoffman.

If you have any ideas, comments or questions please contact one of the above members.

Nikki Cale scores career high 42 points

Lady Pioneers Slip By WV State

Nikki Cale hit a 3-pointer with 4 seconds left sending the game into overtime where the Lady Pioneers were able to defeat WV State 97-91. On the evening Cale scored a career high 42 points (tying school record set by Tammy Pence-ughes in the 1989-90 season). Others scoring in double digits on the evening were Marcia Moore with 12 points and Tami Simons with 11. The win upped the Lady Pioneers record to 6-8 overall and 5 in the conference.

Glenville Defeats Columbia Union

Uwone Jackson led a host of double-digit scorers as the Pioneers defeated Columbia Union 109-81. This marked the sixth time they have eclipsed the 100 point barrier.

Trailing by 1 at 18-17 Jackson hit a three pointer, giving the Pioneers a 20-18 lead, a lead they would never relinquish.

The big story of the game at the 4 minute mark of the first half as crowd favorite Andre Dekok entered the game and responded

with 7 big points which helped propel the hosts to a comfortable 53-39 lead.

Columbia did make a run to start the second half by outscoring Glenville 24-14 to cut the deficit to 67-63. This run seemed to tire the visitors from Maryland as Glenville outscored the 42-18 the rest of the way. Other double-digit scorers on the night were Will Jackson with 19, John McKinley with 14 and Eric Knight added 12.

In Case You Missed It...

During the Christmas break the Pioneers played in three games going 2-1 in that time span. They finished third in the Clarion Tournament and defeated Bluefield. In the first game Glenville lost by the score of 86-79 to St. Vincent. Leading the Pioneers in scoring was Uwone Jackson with 31 points. The only other double-digit scorer was newcomer John McKinley with 20 points.

In the consolation game the Pioneers fared much better,

Glenville Nips WV State

Pat Stone missed a free throw with 4 seconds left that would've sent the game into overtime. With the miss the Pioneers

beating Mt. St. Mary by the score of 85 to 76. Trailing by 12 at the half Mt. St. Mary opened the second half with a 12-0 run tying the score at 45. The game remained tight till midway through the second half when the Pioneers began a 16-8 run and were able to hold on for the victory. Leading the Pioneers in scoring was John McKinley with 24 points and a team high 9 rebounds. Mike Fallon added 18 for the winners.

were able to escape with a narrow 75-74 victory. Leading Glenville in the scoring column was Chuck Smith with 18 points Richard Smith

added 14 while Uwone Jackson chipped in with 13. The victory raised their record to 10-7 overall and 5-5 in the conference.

Lady Pioneers Fall to 6-9

The Lady Pioneers fell to 6-9 overall and 4-7 in the conference after losing to Charleston 92-64.

Leading the Lady Pioneers in scoring was Tami Simons with 17. Mary Jo Ellyson chipped in with 14 points.

Nikki Cole coming off a career high 42 points was held to just 5 points.

Salem Tigers Topple the Pioneers

Salem-Teikyo's men's and women's basketball teams defeated

both of Glenville State's squads Saturday night.

In the first game, Melissa Swartz scored a game high 31 points leading Salem-Teikyo, who never trailed, to an 81-65 victory.

Leading the Lady Pioneers in scoring was Jackie Myers with 20 points while Belinda Dowler added 15. Tami Simons pulled down a game high 12 rebounds. With the loss dropped Glenville to 6-10 overall and 4-8 in the conference.

In the nightcap the Pioneers fell to Salem-Teikyo 110-

100. Trailing by as much as 28 points at 40-12, Glenville never gave up and was able to cut the lead to seven at 81-74 but were never able to get any closer.

Leading the Pioneers in scoring was Uwone Jackson with 28 points followed by Will Jackson with 20 points. John McKinley added 12.

Chuck Smith pulled down 10 rebounds. The Pioneers now stand at 10-8 overall and 5-6 in the conference.

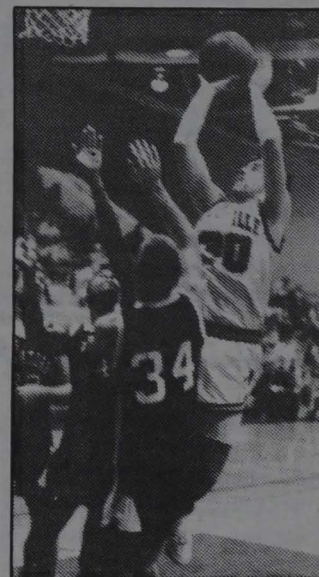

Light will fail in their attempt to win three straight titles Budweiser will defeat Bud Light 31-28.

The Super Bowl is always one of the biggest highlights of the year in the world of sports but this year with the war in the Persian Gulf it makes one realize that no matter how big the game is it is just a game. These men and women in the Persian Gulf are not fighting for a ring or a little extra spending money or even for oil. These men and women are fighting for peace so lets all stand behind them and hope they come home safely and soon.

West Liberty Tops Lady Pioneers

The Lady Pioneers were defeated by West Liberty by the score of 77 to 61. The loss dropped the Lady Pioneers record to 5-8

overall and 3-5 in the conference. Leading scorers were Nikki Cale with 25 and Belinda Dowler with 19.

Brent Emmart shoots for two. photos by Chris Derico

Pioneers Fall to Concord

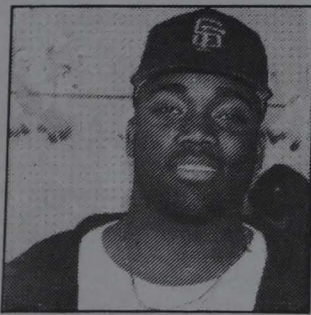

Ron Ward and Todd Lusk combined for 57 points as Concord avenged an earlier loss to the Pioneers by the score of 109-89. Leading the Pioneers in scoring were Eric Knight and Will Jackson with 24 points apiece.

CAPS AND GOWNS

Library Purchases New Copiers

Have you ever wondered what happens to the dimes spent to make photocopies in the library? Most of the money goes to buy the paper, toner, etc. needed to make copies. Some goes for maintenance, upkeep, and repairs on the machines.

A small part is also set aside to replace the equipment as it wears out.

Recently, the library spent a portion of the money to purchase two new copiers. One is a standard

copier and the other photocopies microfiche. These new machines will not only make clearer copies and need fewer repairs, but one also has the added feature of enlarging and reducing originals.

New Fiction Added to Library

by Barbara W. Tedford

Current fiction for leisure-time reading will soon be arriving in the College Library. The Library Committee, chaired by Professor Nancy Zane, has authorized a fiction purchasing committee of students and faculty to order books for what might be termed recreational reading.

In December, Professors Barbara Tedford, Kevin McCartney, and Prem Verma, and student members Kathy Copen and Eric Ware approved about \$300 worth of books to be ordered from the \$400 budget.

These include a sampling of forms and styles, such as science fiction (Arthur C. Clarke, *Ghost from the Grand Banks*), horror (Stephen King, *Four Past Midnight*), romance (Judith Krantz, *Dazzle*), and detective fiction (Amanda Cross, *The Players Come Again*).

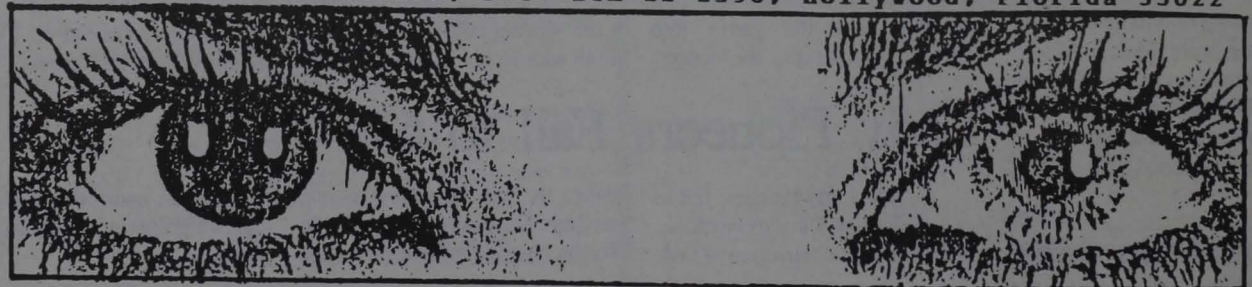

In addition, the committee ordered the latest books by such well-known writers as Harry Crews (*Body*), Jamaica Kincaid (*Lucy*), John Updike (*Rabbit at Rest*), Kurt Vonnegut (*Hocus Pocus*), Muriel Spark (*Symposium*), Nadine Gordimer (*My Son's Story*), Vance Bourjaily (*Old Soldier*), and Joyce Carol Oates (*I Lock My Door Upon*

Myself).

Library patrons should check the New Books shelf to find the latest arrivals. All of the above-mentioned books have received

favorable notice in the New York Times Book Review. The committee welcomes suggestions from students and faculty for book purchases.

Glamour Sponsors Top Ten College Women Competition

The editors of *Glamour* magazine invite Glenville State College Women to compete in their 15th annual Top Ten College Women Competition. The competition honors outstanding women students across the country. A panel of *Glamour* editors will select 10 juniors to receive this

nationally recognized award. Candidates will be chosen on the basis of their leadership abilities, personal involvement in community/campus affairs and academic excellence. The 10 winners receive national recognition for themselves and their colleges, plus a cash prize,

an all-expense-paid trip to New York City to meet with top professionals in their field, and a feature profile in the *Glamour* October 1991 issue. For more information and an application, contact Lisa Booth, 462-4115.

"Operation Native Talent" Job Fair To Be Held

About 60 employees have registered to participate in the Operation Native Talent college job fairs. The first fair will be held Wednesday, January 30, 1991 at the Charleston Civic Center. The second fair will be held Wednesday, February 6, 1991 at the West Virginia University Coliseum in Morgantown. Hours for the fairs will be from 9 a.m. to 3 p.m. This is the fourth annual Operation Native Talent program, which is designed to bring public and private sector employers together with West Virginia college seniors. Last year more than 1,500 students from across the state and

70 employers participated in the program. "This program provides employers with a unique opportunity to meet, interview and recruit West Virginia college seniors with a variety of disciplines and degrees," said Bruce Cox, AT&T district manager and chairman of the ONT steering committee. Career placement officers from West Virginia colleges and universities will help plan and host the fairs, as well as publicize the event to their respective student populations, he added. Operation Native Talent is a joint program of the West

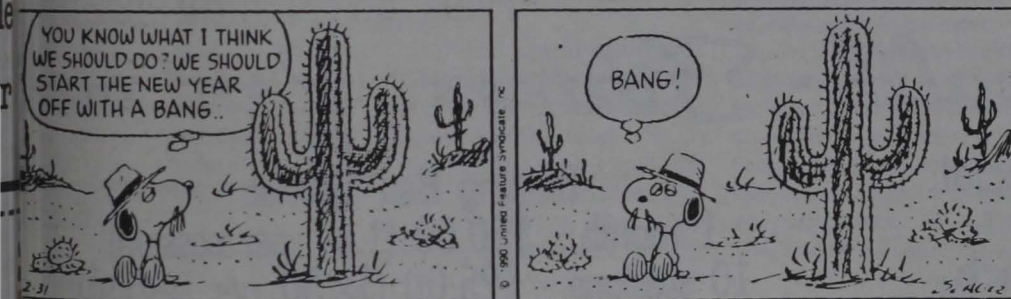

Virginia Roundtable, the West Virginia Chamber of Commerce, the West Virginia College Placement Association and the

Missing: Campus Trees

by Aaron Jarvis

Students returning for the spring semester might notice the trees that have been cut down on various locations around the campus. Over the Christmas break there were a total of four trees cut down; two in front of the Alumni House, and two in front of the Administration

building. The main reasons given for removing the trees were that the trees were becoming weak, their trunks were hollow, and they were becoming hazardous to the surrounding buildings.

There is also a negative side to this story. Cutting down these trees put a squirrel and his

family out of their home during the Christmas holiday. The people in charge of cutting down the trees say that new trees will be planted, but how many trees come big enough for a squirrel to move into? In addition to this, they plan to cut down five more trees in the same area.

The removal of the trees means the buildings are now safe and even though the squirrels are temporarily out of a home, new homes are in their futures. The loss of the trees is not permanent yet they will be missed.

Travel West Virginia Style

by Elizabeth Dotson

Blennerhassett Island is one of West Virginia's fastest growing tourist attractions. Located near Parkersburg, this island holds one of the most spectacular mansions ever built in West Virginia. A 20 minute ride on a sternwheel paddleboat takes you to the island from Parkersburg's Point Park where it leaves on the hour.

While on the island, one

may tour the reconstructed mansion. Picnic facilities are available for those who wish to bring along a picnic lunch. Horse drawn carriages along with bicycle rentals are available for touring the island. But if you wish to take your time and enjoy the wonderful scenery, foot paths are accessible. Skeletons from ancient Indians are part of the attractions as well as deer, squirrels and other wildlife. Crafts are made

daily, ranging from flower arrangements to blacksmith works and are for sale if you wish to purchase them.

The island is only open for touring from May through November, but the Museum and Welcome Center are open year round. Prices are:

Adults - \$4.50 (boatride only)
\$7.00 (includes tour of mansion and boatride)

Children (ages 6-12) - \$3.50 (boatride only)
\$4.50 (includes tour of mansion and boatride)
Children 5 and under - free
For more information call (304) 428-3000.
