

## Wireless Authentication

### Android OS

1. Upon selecting the GSC network from your Android device's wireless list, you will be presented with a screen with at least the following three fields: EAP method, Phase 2 authentication, CA certificate, Identity, Anonymous Identity, and Password.
2. EAP method, select PEAP
3. Phase 2 authentication, select MSCHAPV2
4. Enter your glenville.edu username in the Identity field: gsc\ID# (for commuters) or gsc\first.last (for faculty/staff).
5. Enter the password that goes with the above username in the password field, after you have authenticated with a wired connection, either with your office computer or lab computer.
6. Click Connect.
